

## بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

The Pursuit of sustainable security is an inherent and instinctive part of human being and a historical quest. No country can afford to ignore its security. The Divine prophets and the righteous also sought to offer guidelines, in the light of their faith in God and Divine teachings, to assure a safe and serene life in both worlds. To them, the ideal society is a society of global scale based on the monotheism and justice and replete with security, affection and brotherliness, and which is led by the noblest servant of God along with the Jesus Christ (P.B.U.H) and other righteous people.

Islamic Republic of Iran expresses a great support to the project of the Forum for the 21th century and thanks to the chairman for taking responsibility over the process of negotiations. Iran principally agrees on proposes, which could assure safe and serene life for people, what the following statements demonstrate.

### 1. article

Iran will support proposals of the Forum for the 21th century, because the reform of the UN Security council is in the present time inevitable. The Structure of the UN Security council is unjust and unbalanced. The structure is a remnant of the World War II and is not compatible with the realities of the present world anymore. UN reform should guarantee collective decision making for international community taking into account opinion of the developing states in administration of the world body. The nations and governments seeking justice and freedom will certainly stand by you in such a campaign to ensure that the international relations will be based on justice, ethics, equality and human respect.

### 2. article

Iran supports such definition of an aggression, which will be shared among the whole world community of states. Iran is against every form of aggression and terrorism, but the process of removal has to be carried out against every form of terrorism everywhere in the world. If there is terrorism in the Arabic land, it must be removed so, as it would be handled in Europe, America and elsewhere in the world.

### 3. article

The Global crisis management could operate under the UN organization, which now serves as global decision-making platform and ground for such initiatives as new management would be. The only condition is balanced decision-making on the global level, which does not considerate only political powers, but real demands of developing countries, small states and non-governmental organizations.

### 4. article

The ultimate interest of private military companies is to sell most weapons, as they can. Overfilling the world with weapons cannot lead to a future sustainable peace. Weapons should be held for the sake of self defend and world should be prevented of the mass armament. Therefore it would be right to agree at least on an ethical code for private military business.

### 5. article

Iran is the signatory state of Nuclear Non-Proliferation Treaty in 1968. Nuclear energy is clean and cheap and a heavenly gift which is amongst the most suitable alternatives to cut the pollutions emanating from fossil fuels. The Non- Proliferation Treaty (NPT) allows all member States to use nuclear energy without limits and the International Atomic Energy Agency is mandated to provide member States with technical and legal support. The nuclear bomb is the worst inhumane weapon and which must totally be eliminated. The

NPT prohibits its development and stockpiling and calls for nuclear disarmament. Therefore our motto is "Nuclear Energy for all, Nuclear Weapons for None ". In November 2010 Iran is ready to hold talks on the nuclear program. One condition is sure – a greater variety of countries must be involved and they must express the view on nuclear arsenal of states, which didn't sign NPT.

Let's hope for a day on which through realization of justice, no one will be infuriated, and even if so happened, let's hope again no weapon would be found to satisfy it.

We wish to all of you success and prosperity
